Master study programme **Business Economics**

Faculty of Economics and Management

<http://www.fem.uniag.sk/en/bachelor-and-master-programmes/>

Programme graduates are able to analyse complex economic relations in business processes, make suggestions and managerial decisions. They have a good knowledge of operational business management and strategic decision making in the context of economical globalisation. Graduates are able to work with advanced information systems in enterprises; they are skilled in organisation of managerial work and managerial communication. Both general and professional knowledge of economics supported by foreign language skills predetermine the programme graduates to become efficient economists and managers in top management of any enterprise or company within the agricultural and food processing industry.
